(h) ~~manual means~~ a hand washer having a fluid supply hose communicating
with a source of fluid pressure for manual cleaning parts.

2. (Original) The combination sink and jet parts washer of Claim 1 wherein said sink
5 is hinged to said base cabinet.

3. (Original) The combination sink and jet parts washer of Claim 1 wherein said sink
is removably seated on said cabinet.

10 4. (Original) The combination sink and jet parts washer of Claim 1 wherein said sink
is on [[guide]] guide means and is slidable between said open and closed positions.

5. (Original) The combination sink and jet parts washer of Claim 1 wherein said
manual means includes a brush and a valve to regulate the fluid flow.

15

6. (Original) The combination sink and jet parts washer of Claim 1 wherein a
dampening closer extends between said sink and cabinet.

7. (Original) The combination sink and jet parts washer of Claim 3 wherein said closer is a gas spring.

8. (Original) The combination sink and jet parts washer of Claim 1 wherein said
5 means for rotating said receptacle comprises vane means attached to said basket
positioned to be driven by fluid flow to said pump.

9. (Original) The combination sink and jet parts washer of Claim 1 wherein said
means for rotating said receptacle comprises a gear motor and pulley.

10

10. (Currently Amended) The combination sink and jet parts washer of Claim 1
wherein said pump is driven by ~~a n-electrical~~ an electric motor in a circuit having a safety
interlock permitting operation of the motor only when the sink is in a closed position.

11. The combination sink and jet parts washer of Claim 7 wherein said circuit is
15 connected to an electrical heater located in the reservoir.

12. The combination sink and jet parts washer of Claim 1 wherein said sink is
generally rectangular having sidewalls which terminate at an upwardly flared flange.
